India Ratings Assigns Punjab National Bank's AT1 Bonds 'IND AA+' /Stable; Affirms Existing Ratings

Sep 12, 2023 | Public Sector Bank

India Ratings and Research (Ind-Ra) has taken the following rating actions on Punjab National Bank (PNB):

Instrument Type	Date of Issuance	Coupon Rate (%)	Maturity Date	Size of Issue (billion)	Rating/Outlook	Rating Action
Long-Term Issuer Rating	-	-	-	-	IND AAA/Stable	Affirmed
AT1 bonds*	-	-	-	INR10.00	IND AA+/Stable	Assigned
AT1 bonds*	-	-	-	INR117.95	IND AA+/Stable	Affirmed
Fixed deposits	-	-	-	-	IND AAA/Stable	Affirmed
Basel III Tier 2 bonds*	-	-	-	INR210.00	IND AAA/Stable	Affirmed
Senior infrastructure bonds*	-	-	-	INR20.00	IND AAA/Stable	Affirmed
Certificates of deposit (CDs)	-	-	1-365 days	INR600.00	IND A1+	Affirmed

*Details in Annexure

Analytical Approach: Ind-Ra factors into the ratings PNB's systemically important position and the likelihood of the bank continuously receiving the support from the government of India (GoI). Ind-Ra also considers PNB's demonstrated equity raising ability and the likelihood of an improvement in its pre-provisioning operating profitability over FY23, helping the bank maintain and possibly grow its market share in advances and deposits.

For AT1 instruments, the agency considers the discretionary component, coupon omission risk and the write-down/conversion risk as key parameters to arrive at the rating. The agency recognises the unique going-concern loss absorption features that these bonds carry and differentiates them from the bank's senior debt, factoring in a higher probability of an ultimate loss for investors in these bonds.

Key Rating Drivers

High Systemic Importance: PNB's systemic importance has increased further with the amalgamation, making it the second-largest public sector bank (PSB) in terms of deposit market share and third largest in terms of net advances market share, leading to high probability of support from the GoI, if required. In terms of systemic importance, on an amalgamated basis, PNB's market share in total deposits and gross advances was about 7.1% and 6.3%, respectively, in FY23. Even if private banks were to be included, PNB's positioning would remain significant, with the bank being the third largest in terms of deposits market share and sixth largest in terms of net advances market share. The amalgamated bank has 10,076 branches, two international branches, 12,898 automated teller machines, 24,227 business correspondents and about 180 million customers. PNB is also the convenor bank in six state-level banking committees, second only to the State Bank of India (SBI; 'IND AAA/Stable'), and it is also the district-level convener bank in 112 districts (18.3% of total).

Capital Buffers Adequately Placed; Muted Internal Accruals May Dampen Growth Prospects: PNB is a well-capitalised PSB, with a common equity tier-1 (CET-1) ratio of 10.85% in 1QFY24 (FY23: 11.22%, FY22: 10.56%) and a capital adequacy ratio (CAR) of 15.54% (15.50%). The bank's CET levels are largely in line with that of large PSBs. Even after factoring in elevated provisioning requirements in the near term on account of ageing provisions, the agency believes that the capital buffers would remain significantly higher than the regulatory requirements, owing to its increasing internal accruals. Furthermore, PNB had raised INR55.9 billion through two qualified institutional placements in FY21 and FY22; this gives the agency incremental comfort with respect to the bank's capital raising ability. The agency believes that while capital is adequate for now, continued growth of advances, further catch up in provision coverage ratio and the need to build buffers ahead of implementation of expected credit loss norms while having subdued internal accruals could keep capital ratios under pressure in the near- to medium-term.

Strong Low-cost Liability Franchise: PNB's liability franchise has increased in size and dominance within the Indian banking industry, with it becoming the second-largest PSB on an amalgamated basis. Its strong and stable low-cost current account and savings account (CASA) deposit base, with CASA ratio of 41.0% in 1QFY24 (FY23: 42.0%) is largely in line with the median of the peer group. The agency believes that given the bank's market share in system advances is significantly higher than that of its current account deposit market, it would continue to benefit from its focus on improving the CASA ratio.

Liquidity Indicator - Superior: PNB's short-term (one year) asset-liability surplus stood at 18.0% at 4QFY23. The bank also maintained 24.1% of the total assets in balances with the Reserve Bank of India and in government securities in 4QFY23, which assures Ind-Ra that it is adequately placed to meet its short-term funding requirements. Moreover, PNB maintained a liquidity coverage ratio of 159.54% in 1QFY24 on a consolidated basis as against the regulatory requirement of 100%.

Increasing Pre-Provisioning Operating Profit; Although Profitability Under Pressure: Post-amalgamation, which was effective from 1QFY21, PNB has reported profits consistently on a quarterly basis and the profit for FY22 grew significantly over FY21. However, the trend has been volatile, partially due to the COVID-19 pandemic. During FY23, the profit after tax declined sharply to INR25.1 billion (FY22: INR34.6 billion) on account of higher operating expenses and provisioning requirements, despite healthy growth in the pre-provisioning operating profit to INR225.3 billion (INR207.6 billion). The pre-provisioning operating profit for FY23 was higher on a year-on-year basis despite factoring in the provisions related to Accounting Standard – 15, which arose on account of the impact of impending wage revision on pension and gratuity.

The management has guided for a further decline in the gross non-performing assets (NPAs) and gross NPA ratios. The agency believes that the provisioning requirement in FY24 are likely to remain subdued in comparison to earlier years as the prevailing risk environment is benign and large corporate slippages have already been recognised. However, provisions will still remain significant due to: i) ageing provisioning requirements; and ii) provisioning requirements for fresh slippages, including that from the Emergency Credit Line Guarantee Scheme and COVID-19 restructuring pools.

Asset Quality Challenges Continue: PNB has been increasing its provision coverage ratio, which stood at 75.8%

(excluding technical write-offs) in 1QFY24 (FY23: 70.8%, FY22: 62.2%) and is now at median levels within the peer group. The bank also carried almost 100% provisions against its exposures to the National Company Law Tribunal (NCLT)-1 and -2 lists and 99.8% against the overall NCLT exposure in 1QFY24. In 1QFY24, its gross NPAs and net NPAs continued to decline but remained elevated at 7.73% and 1.98% (FY23: 8.74% and 2.72%; FY22: 11.78% and 4.80%), respectively, compared to its peers. Furthermore, the special mention account-2 pool with ticket size of above INR50 million stood at negligible levels (0.20% of net advances). Its COVID-19 restructuring pool under one-time restructuring 1 and one-time restructuring 2 of INR105.5 billion (1.22% of net advances) and Emergency Credit Line Guarantee Scheme outstanding of INR100.5 billion (1.16% of net advances), together 2.59% of the net advances, which is the potential pool for slippages over the near- to medium-term.

Rating Sensitivities

Negative: PNB's Basel III Tier 2 bond ratings have been equated to its Long-Term Issuer Rating, which could change if, in Ind-Ra's opinion, the Govt's support stance for PSBs changes or there is material drop in the banks' systemic importance which could, among other things, reflect in a material decline in PNB's market share or loss of deposit franchise.

The notching of the AT1 bonds could be widened from its anchor ratings if Ind-Ra believes that there is a dilution in the government's support stance towards hybrid instruments of PSBs or any delay in the timeliness of extending this support. This could reflect among other things in capital buffers continuing to be close to the regulatory levels. Ind-Ra also expects that for banks with weaker unsupported profiles, the capital buffers would be higher; if not, it could reflect in a wider notching from the Long-Term Issuer Rating. These capital buffers could be important as PNB's ability to service the instrument could be impaired in the event of the bank making losses and/or if the capital levels are below the regulatory minimum.

ESG Issues

ESG Factors Minimally Relevant to Rating: Unless otherwise disclosed in this section, the ESG issues are credit neutral or have only a minimal credit impact on PNB, due to either their nature or the way in which they are being managed by the entity.
