Punjab National Bank (herein after referred to as the 'Bank') is the top consolidated entity in the Banking group to which the Capital Adequacy Framework under Basel III applies. The consolidated financial statements of the group conform, in all material aspects, to Generally Accepted Accounting Principles (GAAP) in India, encompassing applicable statutory provisions, regulatory norms prescribed by Reserve Bank of India (RBI), circulars and guidelines issued by RBI from time to time, Banking Regulation Act 1949, Companies Act, 2013, Accounting Standards (AS) and pronouncements issued by The Institute of Chartered Accountants of India (ICAI) and prevailing practices in Banking industry in India.

Table DF-1: Scope of Application

(i) Qualitative Disclosures:

a. List of group entities considered for consolidation

- For accounting scope of consolidation, all the group entities of the Bank are considered for consolidation in accordance with AS 21, Consolidated Financial Statements and AS 23, Accounting for Investments in Consolidated Financial Statements.

- For regulatory scope of consolidation, all the group entities, except insurance and non-financial subsidiaries / joint ventures / associates, are fully consolidated for the purpose of capital adequacy. Regulatory scope of consolidation refers to consolidation in such a way as to result in the assets of the underlying group entities being included in the calculation of consolidated risk- weighted assets of the group.

With regard to restriction and impediments, local laws and regulation of host countries are applicable

Table DF-2: Capital Adequacy

Qualitative Disclosures:

(a)

1. Capital Adequacy

The Bank believes in the policy of total risk management. The bank views the risk management function as a holistic approach whereby risk retention is considered appropriate after giving due consideration to factors such as specific risk characteristics of obligor, inter relationship between risk variables and corresponding return and achievement of various business objectives within the controlled operational risk environment. Bank believes that risk management is one of the foremost responsibilities of top/ senior management. The Board of Directors decides the overall risk management policies and approves the Risk Management Philosophy & Policy, Credit Management & Risk policy, Investment policy, ALM policy, Operational Risk Management policy, Policy for internal capital adequacy assessment process (ICAAP), Credit Risk Mitigation & Collateral Management Policy, Stress Testing Policy and Policy for Mapping Business Lines/Activities, containing the direction and strategies for integrated management of the various risk exposures of the Bank. These policies, inter alia, contain various trigger levels, exposure levels, thrust areas etc.

The Bank has constituted a Board level subcommittee namely Risk Management Committee (RMC). The committee has the overall responsibility of risk management functions and oversees the function of Credit Risk Management Committee (CRMC), Asset Liability Committee (ALCO), Market Risk Management Committee (MRMC) and

Operational Risk Management Committee (ORMC). The meeting of RMC is held at least once in a quarter. The bank recognizes that the management of risk is integral to the effective and efficient management of the organization.

2. Credit Risk Management

2.1.1 Credit Risk Management Committee (CRMC) headed by MD & CEO is the top-level functional committee for Credit risk. The committee considers and takes decisions necessary to manage and control credit risk within overall quantitative prudential limit set up by Board. The committee is entrusted with the job of approval of policies on standards for presentation of credit proposal, fine-tuning required in various models based on feedbacks or change in market scenario, approval of any other action necessary to comply with requirements set forth in Credit Risk Management Policy/ RBI guidelines or otherwise required for managing credit risk.

2.1.2 In order to provide a robust risk management structure, the Credit Management and Risk policy of the Bank aims to provide a basic framework for implementation of sound credit risk management system in the bank. It deals with various areas of credit risk, goals to be achieved, current practices and future strategies. As such, the credit policy deals with short term implementation as well as long term approach to credit risk management. The policy of the bank embodies in itself the areas of risk identification, risk measurement, risk grading techniques, reporting and risk control systems / mitigation techniques and documentation practice.

Zonal Risk Management Cells (ZRMCs) have been set up at zonal level as an extended arm of HO: IRMD to inculcate risk culture at field level in line with Risk Philosophy of the Bank. The new risk assessment structure focuses on complete segregation of credit risk assessment system from credit underwriting by centralizing the risk rating process parallel to Zonal Level under direct control of Integrated Risk Management Division at Head Office, whereas the credit delivery system shall continue through business delivery structure of credit verticals and zones. The segregation of processes had been introduced to create an independent efficient risk assessment and third eye view based calculation of risk over a borrowing entity.

For better support, control & transparent structure of reporting, organization structure in the bank has been revamped. In this regard, Bank has introduced specialized lending branches for catering to loans from Rs 10 lacs to Rs 1 Crore through PNB Loan Point (PLP) in respect of Retail, Agriculture and MSME segments. Mid Corporate Centres (MCC) shall sanction loans above 1 crore upto 10 crore. Corporate Banking Branches (CBBs) shall handle Non Retail Credit proposals above Rs.10 Crores. LCB & ELCBs for loans above Rs.50 crores and Rs.500 crores respectively have been put in place. All loan proposals falling under the powers of MCC, Circle Office, Zonal Office and Head office are considered by Credit Approval Committees.

2.1.3 Bank has developed comprehensive risk rating system that serves as a single point indicator of diverse risk factors of counterparty and for taking credit decisions in a consistent manner. The risk rating system is drawn up in a structured manner, incorporating different factors such as borrower's specific characteristics, industry specific characteristics etc. Risk rating system applicable to all borrowers with total limits above Rs.100 Lacs w.e.f. 07.05.2022 (previously the minimum threshold for considering Internal Risk Ratings was above Rs.50 Lacs). Bank is undertaking periodic validation exercise of its rating models and also conducting migration of Internal Risk Ratings and default rate analysis to test robustness of its internal risk rating models.

Small & Medium Enterprise (SME), Retail advances and lending to agriculture are subjected to scorecard assessment which support "Accept/ Reject" decisions based on the scores obtained. All eligible SME, Retail loan and Agriculture lending applications are necessarily to be evaluated under score card system. All rating models/ scorecards developed by the Bank are online at bank's central server network and can be accessed through any office of the bank. Additionally, bank has also developed score cards, for evaluating lending proposals under other schemes/ product arrangements such as co-lending arrangement with NBFCs, digital lending & credit cards and these are placed within the portals being utilized for these products/ arrangements.

To strengthen the credit monitoring landscape, Bank has implemented a new Early Warning system i.e., PNB SAJAG 2.0, a fully digitized and automated Early Warning Signal (EWS), which monitors all eligible borrowal accounts through 133 early warning signals (including 42 EWS prescribed by RBI and 85 EWS prescribed by DFS), powered by automated continuous flow of both internal and external data.

In addition to these 133 alerts, PNB SAJAG 2.0 also incorporates 27 overrides, to highlight certain critical risk parameters, which if invoked, escalates the EWS score of the borrower to pre-defined levels. These 133 alerts have been categorized into 4 severity categories, viz. Critical, High, Medium and Low, and timelines for closure of alerts falling under each of these categories have been prescribed.

PNB SAJAG 2.0 also displays last 5-year financials, key ratios, list of suspicious transactions, round-tripping transactions, transactions with suppliers and clients, any cases pending in NCLT, etc. for each borrower. Further, the system also provides intuitive graphical time charts for trends in key risk factors such as transaction count, Drawing Power, Key financial ratios, etc. to provide a 360-degree view on the borrower.

2.1.4 Bank has implemented enterprise-wide data warehouse (EDW) project, to cater to the requirement for the reliable and accurate historical data base and to implement the sophisticated risk management solutions/ techniques and the tools for estimating risk components {PD (Probability of Default), LGD (loss Given Default), EAD (Exposure at Default)} and quantification of the risks in the individual exposures to assess risk contribution by individual accounts in total portfolio and identifying buckets of risk concentrations.

2.1.5 As an integral part of Risk Management System, bank has put in place a well-defined Loan Review Mechanism (LRM). This helps bring about qualitative improvements in credit administration. A separate Division known as Credit Audit & Review Division has been formed to ensure LRM implementation.

2.1.6 The risk rating and vetting process is done independent of credit appraisal function to ensure its integrity and independency. The rating category wise portfolio of loan assets is reviewed on half yearly basis to analyze mix of quality of assets etc.

2.1.7 The bank has implemented the Standardized Approach of credit risk for RWA computation as per RBI extant guidelines and further we are in the process of adoption of Internal Rating Based Approaches (IRB). Bank has received approval from RBI for adoption of Foundation Internal Rating Based Approach (FIRB) on parallel run basis w.e.f. 31.07.2013. Further, bank has placed notice of intention to RBI for implementing Advanced Internal Rating Based (AIRB) approach for credit risk.

Major initiatives taken for implementation of IRB approach are as under:

- For corporate assets class, bank has estimated the PD (Probability of Default) based upon model wise default rates viz. Large Corporate and Mid Corporate borrowers using Maximum likelihood estimator (MLE). For retail asset class, PD is computed for identified homogeneous pool by using exponential smoothing technique.
- LGD (Loss Given Default) values have been calculated by using workout method for Corporate Asset Class as well as for each homogenous pool of Retail Asset Class.
- Bank has also put in place a mechanism to arrive at the LGD rating grade apart from the default rating of a borrower. The securities eligible for LGD rating are identified facility wise and the total estimated loss percentage in the account is computed using supervisory LGD percentage prescribed for various types of collaterals and accordingly LGD rating grades are allotted.
- Benchmarking of Cumulative Default Rates: Benchmark values of cumulative default rates for internal rating grades have been calculated based on the published default data of external rating agencies. The benchmark values is used for monitoring of cumulative default rates of internal rating grades and PD validation.
- Bank has adopted supervisory slotting criteria approach for calculation of capital under specialised lending (SL) exposure falling under corporate asset class.
- Bank has put in place a comprehensive "Credit Risk Mitigation & Collateral Management Policy", which ensures that requirements of FIRB approach are met on consistent basis.
- For Low Default Portfolios, separate model has been deployed and PD is being estimated based on the same, tailored to the unique characteristics of these portfolios. Additionally, Bank has also developed Exposure at Default Model for corporates asset class-based utilizing internally estimated conversion factors to account for the undrawn portion of credit limits.

2.2 Market Risk

2.2.1 The investment policy covering various aspects of market risk attempts to assess and minimize risks inherent in treasury operations through various risk management tools. Broadly, it incorporates policy prescriptions for measuring, monitoring and managing systemic risk, credit risk, market risk, operational risk and liquidity risk in treasury operations.

2.2.2 Besides regulatory limits, the Bank has put in place internal limits and ensures adherence thereof on continuous basis for managing market risk in trading book of the bank and its business operations. Bank has prescribed entry level barriers, exposure limits, stop loss limits, VaR limits, Duration limits and Risk Tolerance limits for trading book investments. Bank is keeping constant track on Migration of Credit Ratings of investment portfolio. Limits for exposures to Counterparties, Industry Segments and Countries are monitored. The risks under Forex operations are monitored and controlled through Stop Loss Limits, Overnight limit, Daylight limit, Aggregate Gap limit, Individual Gap limit, Value at Risk (VaR) limit, Inter-Bank dealing and investment limits etc.

2.3 Operational Risk

Basel Committee and subsequently RBI have defined Operational Risk (OR) as “the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events”. This definition includes legal risk, but excludes strategic and reputational risk. The Bank has also adopted the same definition for management of operational risk within the bank.

The Bank has a robust Board approved Operational Risk Management policy with clearly defined roles and responsibilities to mitigate operational risk arising out of the Bank’s business and operations. The Bank adopts three lines of defense model for management of operational risk.

First line of defence are the Business Divisions. These Divisions being owner of various banking activities, take up management of operational risks within their owned activities, undertake actions for management/mitigation of these risks and take any business line/division level decisions with respect to operational risk. They propagate Operational Risk Management (ORM) policies as laid down by the Board. They analyse the findings of Risk & Control Self- Assessment (RCSA), Key Risk Indicators (KRI) & loss events and initiate action for strengthening of internal processes, management/ mitigation of Operational Risk and explore use of insurance and other mitigating options.

Second Line of defence is Risk Management Division which is responsible for framing the Operational Risk Framework/Policy and ensuring implementation thereof. Operational Risk Management Division acts as a repository of Operational Risk Loss Data Base, KRIs, RCSA Surveys results, and uses the same for root cause analyses, Operational Risk Management and Measurement. Certain information collected and published by Control Units like Inspection & Audit Division, Transaction Monitoring Division and Security Department etc. are used to identify, control, monitor and mitigate the operational risk at Bank wide level.

Third line of defence is Inspection & Audit Division which is responsible for independent review and validation of Operational Risk Management Framework (ORMF) and Operational Risk Management System (ORMS) at Bank wide level.

Governance and Organizational Structure for Managing Operational Risk:

Operational Risk Management Committee **(ORMC)** headed by Executive Director looking after Integrated Risk Management Division along with all other EDs and CGMs / GMs of various divisions as members, is the Executive level committee to oversee the operational risk, responses to risk issues and the adequacy and effectiveness of controls within operational risk control area. Operational Risk Management Committee (ORMC) reports to Risk Management Committee **(RMC)** and **Board**. Risk Management Committee (RMC) is a sub-committee of the Board which oversees the overall risk management of the bank.

An independent Operational Risk Management Department **(ORMD)** is a sub-division under Integrated Risk Management Division headed by Group Chief Risk Officer. ORMD is responsible for implementation of ORM Policies for ensuring a strong ORM culture and effective operational risk management across the Bank. It works in co-ordination with the business divisions, control divisions and all other functions of the bank.

With increasing digitization and role of IT in banking operation, the bank has set up IT risk vertical under ORMD to effectively identify, assess, monitor and address ICT risk and build IT operational resilience in the bank.
To address risk and control in product and process, the Bank has a product approval policy. All the product/processes are routed through System and Product Approval Committee of Executives **(SPACE).** The policy defines the roles and responsibilities of First, Second and Third line of defence to establish effective governance for product and processes.

For management of operational risks at HO division level, each business line/division has a Risk Assessment Committee **(RAC).** This committee is headed by Divisional Head of the concerned division. The committee identifies the operational risks present in the existing/new products/processes/activities of that business line/division, take corrective/preventive/pre-emptive steps to monitor and control the Operational Risk within the overall ORM Policy of the Bank.

In order to ensure completeness and correctness of loss data and also to inculcate risk culture deep down the ladder in the Bank, committees named as ‘Checks on Threats to Reduce Op-risk Losses (**CONTROL**) and Joint Action Group on Op-risk Control (**JAGROC**) have been formed at Circle level and Zonal level respectively which also identify and evaluate the internal and external factors that could adversely affect the achievement of Bank’s performance, corporate goals, information system, and compliance objective of the Bank guidelines.

Tools to measure & monitor Operational Risk

Internal Control is an essential pre-requisite for an efficient and effective operational risk management. Bank has clearly laid down policies and procedures to ensure the integrity of its operations, appropriateness of operating systems and compliance with the management policies. Apart from the Operational Risk Management (ORM) Policy and the Policy for approval of New Product, other established Frameworks/Policies for control and mitigation of operational risk includes

1) Policy for Business Continuity Plan (BCP)
2) Policy for Outsourcing of Financial Services
3) Loss Data Collection Framework
4) IT and Information Security Risk Management Framework.
5) Risk & Control Self-Assessment Framework- It's a proactive exercise which helps in identifying control gaps and consequent actions proposed to close the gaps. RCSA is used for identification & mitigation of operational risks, reporting of control deficiencies, monitoring of changes in control environment and assessment of operational risk profile.
6) Business Line Mapping Framework as per Basel defined 8 Business Lines and 7 Loss Event Types.
7) Key Risk Indicator Framework-The indicators have been defined subject to annual review with threshold and monitoring mechanism. These indicators are metrics/ measures that are derived from various factors to indicate an early warning of or to monitor increasing risk or control failures in an activity.
8) Stress testing/Scenario analysis to assess the operational risk impact based on hypothetical severe loss situation.
9) Incident Reporting Mechanism.

Quantitative Disclosures:

Table DF- 3: Credit Risk: General Disclosures

(i) Qualitative Disclosures:

(a)

3.1. Any amount due to the Bank under any credit facility is overdue if it is not paid on the due date fixed by the Bank. Further, an impaired asset is a loan or an advance where:

(i) Interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a term loan.

(ii) The account remains out of order in respect of an overdraft/cash credit continuously for a period of 90 days.

An account will be treated out of order, if:

- the outstanding balance in CC/OD account remains continuously in excess of the sanctioned limit/drawing power for 90 days, or

- the outstanding balance in the CC/OD account is less than the sanctioned limit/drawing power but there are no credits continuously for 90 days, or the outstanding balance in the CC/OD account is less than the sanctioned limit/drawing power but credits are not enough to cover the interest debited during the previous 90 days period (‘Previous 90 days period’ shall be inclusive of the day for which the day-end process is being run).

(iii) In case of bills purchased & discounted, the bill remains overdue for a period of more than 90 days.

(iv) The installment of principal or interest thereon remains overdue for two crop seasons for short duration and the installment of principal or interest thereon remains overdue for one crop season for long duration crops in case of Agricultural loans.

The classification of an assets as overdue/impaired, reflects the status of an account at the day-end of that calendar date, irrespective of the time of running of such processes.

Credit approving authority, prudential exposure limits, industry exposure limits, credit risk rating system, risk based pricing and loan review mechanisms are the tools used by the bank for credit risk management. All these tools have been defined in the Credit Management & Risk Policy of the Bank. At the macro level, policy document is an embodiment of the Bank's approach to understand measure and manage the credit risk and aims at ensuring sustained growth of healthy loan portfolio while dispensing the credit and managing the risk.

Table DF- 4 - Credit Risk: Disclosures for Portfolios Subject to the Standardized Approach

Qualitative Disclosures:

(a)

4.1. Bank has the following seven approved domestic credit rating agencies circulated vide IRMD circular no. 03/2023 dated 19.01.2023 accredited by RBI vide "Basel III Capital Regulations - Eligible Credit Rating Agencies" notification dated 09.01.2023 for mapping its exposure with domestic borrowers under standardized approach of credit risk.

- CARE
- CRISIL
- ICRA
- India Ratings
- Acuite (Erstwhile SMERA)
- INFOMERICS

Bank has also approved the following three international credit rating agencies accredited by RBI in respect of exposure with overseas borrowers.

- FITCH
- Moody's
- Standard & Poor

These agencies are being used for rating (Long Term & Short Term) of fund based/ non-fund-based facilities provided by the bank to the borrowers. The bank uses solicited rating from the chosen credit rating agencies.

The ratings available in public domain are mapped according to mapping process as envisaged in RBI guidelines on the subject.

Quantitative Disclosures:

(b) For exposure amounts after risk mitigation subject to the standardized approach, amount of a bank's outstanding (rated and unrated) in the following three major risk buckets as well as those that are deducted are as under:

(Rs. in millions)

Particulars	Amount
i) Below 100% risk weight exposure outstanding	9762183.53
ii) 100% risk weight exposure outstanding	1653297.86
iii) More than 100% risk weight exposure outstanding	747035.42
iv) Deducted	0.00

Table DF-5: Credit Risk Mitigation: Disclosures for Standardized Approaches

Qualitative Disclosures:

(a)

5.1. Bank has put in place Board approved ‘Credit Risk Mitigation and Collateral Management Policy’ which, interalia, covers policies and processes for various collaterals including financial collaterals and netting of on and off-balance sheet exposure.

5.2. The collaterals used by the Bank as risk mitigant comprise of the financial collaterals (i.e. bank deposits, govt./postal securities, life policies, gold jewellery, units of mutual funds etc.). A detailed process of calculation of correct valuation and application of haircut thereon has been put in place by developing suitable software.

5.3. Guarantees, which are direct, explicit, irrevocable and unconditional, are taken into consideration by Bank for calculating capital requirement. Use of such guarantees for capital calculation purposes is strictly as per RBI guidelines on the subject.

5.4. Majority of financial collaterals held by the Bank are by way of own deposits and government securities, where no challenges are encountered in realization. As such, there is no risk concentration on account of nature of collaterals.

Quantitative Disclosures

(Rs. in million)

Particulars	**Amount**
(b) For each separately disclosed credit risk portfolio the total exposure (after, where applicable, on or off balance sheet netting) that is covered by eligible financial collateral after the application of haircuts.	477450.55
(c) For each separately disclosed portfolio the total exposure (after, where applicable, on or off-balance sheet netting) that is covered by guarantees/credit derivatives (whenever specifically permitted by RBI)	928508.61

Table DF-6: Securitization Exposures: Disclosure for Standardized Approach: Bank/Group does not have any securitization exposure

Table DF-7: Market Risk in Trading Book

Qualitative Disclosures:
(a)

7.1 Bank is computing capital charge for Market Risk as per Standardized Measurement Method (Duration Based) updated vide Master Circular – Basel III Capital Regulations dated 01.04.2024.

Quantitative Disclosures*:*
(b)

(Rs. in million)

Risk Category	Amount
i) Interest Rate Risk	7488.87
ii) Foreign Exchange Risk (including Gold)	1637.90
iii) Equity Risk	4290.87
iv) CDS	0.00
Total capital charge for market risks under Standardized duration approach (i + ii + iii + iv)	**13417.63**

Table DF-8: Operational Risk

The bank is currently using the **Basic Indicator Approach (BIA)** for computing regulatory capital for operational risk.

RBI has released the “Master Direction on Minimum Capital Requirements for Operational Risk” on June 26, 2023 which requires computation of regulatory capital for Operational Risk, replacing the existing Basic Indicator Approach. The implementation date of **The New Standardised Approach** is awaited from RBI. The capital requirement as per Basic Indicator Approach (BIA) is Rs. 61859.78 Millions.

Table DF-9: Interest Rate Risk in the Banking Book (IRRBB)

Qualitative Disclosures:
(a)

9.1 The interest rate risk arises due to fluctuating interest rates on rate sensitive assets and liabilities. For earning perspective, Traditional Gap Analysis (TGA) and for economic value perspective, Duration Gap Analysis (DGA) is carried out to assess the interest rate risk at monthly intervals on both trading book and banking book for domestic and overseas operations, as per RBI guidelines. As per ALM Policy, prudential limits have been fixed for impact on Net Interest Income (NII), Net Interest Margin (NIM), Duration gap and Market Value of Equity for the bank. Moreover, behavioral studies are also being done for assessing and apportioning volatile and core portion of various non-maturity products of both assets and liabilities.

Earning Approach
Since, in case of banks, interest income comprises major part of the income, a standardized rate shock analysis for upward or downward rate movement on the Gap statement is done. Accordingly, Earning at Risk (EaR) for different rate shocks is done to assess the impact on Net Interest Income (NII) of the bank due to adverse movement of rate of interest.

9.2 Economic Value Approach

The economic value approach involves analyzing the impact on the capital funds due to change in interest rate by 200 bps using Duration Gap Approach. It assesses the intrinsic values of assets and liabilities from time to time thereby improving banks insight into the profile of assets and liabilities vis-a vis contractual rate and market rate.

As a prudential measure, a limit has been fixed for net duration gap of the assets and liabilities and the same is monitored at regular interval.

Quantitative Disclosures:
(b)

Earning at Risk: The table reveals the impact of 50 bps adverse change in interest rate on Net Interest Income (NII).

Change in interest rate	**Estimated impact on NII due to adverse change in rate of interest up to 1 year**
50 bps	Rs. 12758.81 Million

Economic Value of Equity: The table reveals the impact on Economic Value of Equity for an assumed rate shock of 200 bps on the banking book as at 30.09.2024.

Change in Economic value of Equity	**200 bps**
	Rs. 90977.10 Million

Table DF-10: General Disclosure for Exposures Related to Counterparty Credit Risk

Qualitative Disclosures:
(a)

The Bank uses derivatives products for hedging its own balance sheet items as well as for trading purposes. The risk management of derivative operation is headed by a senior executive, who reports to top management, independent of the line functions. Trading positions are marked to market on daily basis.

The derivative policy is framed by Integrated Risk Management Division, which includes measurement of credit risk and market risk.

The hedge transactions are undertaken for balance sheet management. Proper system for reporting and monitoring of risks are in place. Policy for hedging and processes for monitoring the same is in place.

Accounting policy for recording hedge and non-hedge transactions are in place, which includes recognition of income, premiums and discounts.

Valuation of outstanding contracts, provisioning, collateral and credit risk mitigation are being done.

Quantitative Disclosures:
(b)

Exposure of Counterparty Credit Risk			
Item	**Notional Amount**	**Current Credit Exposure**	**Exposure at Default under Current Exposure Method or Exposure amount under CEM Method**

TABLE DF 13 - Main Features of Regulatory Capital instruments

TABLE DF – 14: Full Terms and Conditions of Regulatory Capital Instruments of PNB Bonds

These disclosures i.e. DF 13 and DF 14 have been uploaded on the Bank's website i.e. www.pnbindia.in>Regulatory Disclosures>Basel III Disclosures>Financial year 2024-2025

Weblink: (https://www.pnbindia.in/Basel-III-Disclosures.html)

TABLE DF 15 – Disclosure Requirements for Remuneration
Not applicable, as Private sector and foreign banks operating in India are mandated to make this disclosure.

TABLE DF-16: Equities – Disclosure for Banking Book Positions		
Qualitative Disclosures		
1	The general qualitative disclosure requirement (Para 2.1 of this annex) with respect to equity risk, including:	
	• Differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons; and	Equity investments in Foreign and Indian subsidiaries, Joint Venture, Associates & Regional Rural Banks are kept in separate category. Other equity investments are kept in AFS and FVTPL (Non HFT) categories as

TABLE DF-16: Equities – Disclosure for Banking Book Positions			
		per new RBI guidelines on Valuation of Investments.	
	• Discussion of important policies covering the valuation and accounting of equity holdings in the banking book. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices.	Accounting and Valuation policies for securities held in banking book are detailed under schedule 17 of Banks Half yearly financial results	
Quantitative Disclosures			(Rs. in million)
		BOOK VALUE 30.09.2024	**FAIR VALUE 30.09.2024**
1	Value disclosed in the balance sheet of investments, as well as the fair value of those investments; for quoted securities, a comparison to publicly quoted share values where the share price is materially different from fair value.	104044.71	170045.10
	Of which Publicly quoted share values where the share price is materially different from fair value.	19944.18	104662.19
2	The types and nature of investments including the amount that can be classified as:		
	• Publicly traded	19944.18	104662.19
	FIs	-	-
	Associates (In India) PNB HFL	9502.46	71750.89

	Associates (outside India)	3415.88	0.00
	Associates (In India) Except PNB HFL	2394.00	8661.76
	RRBs	15318.78	6628.49
	Subsidiaries(In India) Except PNB Gilts	350.00	690.90
	Subsidiaries(Outside India) PNBIL	15571.93	11581.17
	FIs	21196.23	21196.23
	Others	25842.67	16623.22
	The cumulative realised gains (losses) arising from sales and liquidations in the reporting period (01.04.2024 to 30.09.2024)	13.12*	
3	Total unrealised gains (losses)13	2335.94**	
4	Total latent revaluation gains (losses)14	NIL	

TABLE DF-16: Equities – Disclosure for Banking Book Positions		
5	Any amounts of the above included in Tier 1 and/or Tier 2 capital.	20423.03
6	Capital requirements broken down by appropriate equity groupings, consistent with the bank's methodology, as well as the aggregate amounts and the type of equity investments subject to any supervisory transition or grandfathering provisions regarding regulatory capital requirements.	NA

13 Unrealised gains (losses) recognised in the balance sheet but not through the profit and loss account.

14 Unrealised gains (losses) not recognised either in the balance sheet or through the profit and loss account

*Sale of Equity Investments from AFS Category is accounted in Capital Reserve as per new RBI guidelines on Valuation of Investments and is excluded from the above mentioned amount.

**Amount pertains to unrealised gains in Equity Investments in AFS category recognised in the balance sheet but not through the profit and loss account. However, we have unrealised gains in Equity Investments in FVTPL category amounting Rs.1,350.65 Crores which is recognised through the profit and loss account.

Table DF 17 - Summary comparison of accounting assets vs. leverage ratio exposure measure		
	Item	**(Rs. In Million)**
1	Total consolidated assets as per published financial statements	**17226524.50**
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purpose but outside the scope of regulatory consolidation	(40142.83)
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	0.00
4	Adjustments for derivative financial instruments	61994.00
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	9171.17
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures)	906872.67
7	Other adjustments	(171691.27)
8	**Leverage ratio exposure**	**17992728.24**

DF-18 Leverage ratio common disclosure template	
Item	**Leverage Ratio Framework (Rs. In millions)**
On-balance sheet exposures	
1. On-balance sheet items (excluding derivatives and SFTs, but including collateral)	17177210.50
2. (Asset amounts deducted in determining Basel III Tier 1 capital)	(162520.10)
