AT1 bonds*	-	-	-	INR20.00	IND AA+/Stable	Assigned
Basel III Tier 2 bonds*	-	-	-	INR25.00	IND AAA/Stable	Assigned
Fixed deposits	-	-	-	-	IND AAA/Stable	Affirmed
Certificates of deposit (CDs)	-	-	1-365 days	INR600.00	IND A1+	Affirmed
Basel III Tier 2 bonds*	-	-	-	INR115.00	IND AAA/Stable	Affirmed
AT1 bonds*	-	-	-	INR 89.95	IND AA+/Stable	Affirmed
Senior infrastructure bonds*	-	-	-	INR20.00	IND AAA/Stable	Affirmed

\*Details in Annexure

**Analytical Approach:** The Long-Term Issuer Rating factors in PNB's systemically important position and the likelihood of the bank continuously receiving the support from the government of India (GoI). The rating also considers PNB's demonstrated equity raising ability and the likelihood of an improvement in its pre-provisioning operating profitability over FY23, helping the bank maintain and possibly grow its market share in advances and deposits.

For AT1 instruments, the agency considers the discretionary component, coupon omission risk and the write-down/conversion risk as key parameters to arrive at the rating. The agency recognises the unique going-concern loss absorption features that these bonds carry and differentiates them from the bank's senior debt, factoring in a higher probability of an ultimate loss for investors in these bonds.

## Key Rating Drivers

**High Systemic Importance:** PNB's systemic importance has increased further with the amalgamation, making it the second-largest public sector bank (PSB) in terms of deposit market share and third-largest in terms of net advances market share, leading to high probability of support from the GoI, if required. In terms of systemic importance, on an amalgamated basis, PNB's market share in total deposits and net advances was about 7.1% and 6.3%, respectively, in FY22. Even if private banks were to be included, PNB's positioning would remain significant, with the bank being the third-largest in terms of deposits market share and fifth-largest in terms of net advances market share. The amalgamated bank has 10,038 branches, two international branches, 12,966 automated teller machines and about 180 million customers. PNB is also the convenor bank in six state-level banking committees, second only to the State Bank of India (SBI; IND AAA/Stable), and it is also the district-level convener bank in 111 districts (18.3% of total).

**Capital Buffers Adequately Placed:** PNB is a well-capitalised PSB, with a common equity tier-1 (CET-1) ratio of 10.88%

in 2QFY23 (2QFY22: 11.58%) and a capital adequacy ratio (CAR) of 14.74% (15.20%). The bank's CET levels are largely in line with that of larger PSBs. Even after factoring in elevated provisioning requirements in the near term on account of ageing provisions, the agency believes that the capital buffers would remain significantly higher than regulatory requirements, owing to increasing internal accruals. Furthermore, PNB had raised INR55.9 billion (8.2% of 2QFY23 CET I capital) through two qualified institutional placements in FY21 and FY22; this gives the agency incremental comfort with respect to the bank's capital raising ability. Moreover, the bank has board approvals in place to raise INR120 billion (INR55 billion of additional tier I bonds and INR65 billion of tier II bonds) in FY23 through the issuance of bonds – both tier II and additional tier I bonds, which could add up to 200bp to the CAR.

**Strong Low-cost Liability Franchise:** PNB's liability franchise has increased in size and dominance within the Indian banking industry, with it becoming the second-largest PSB on an amalgamated basis. Its strong and stable low-cost current account and savings account (CASA) deposit base, with CASA ratio of 43.9% in 2QFY23 (2QFY22: 44.7%) is higher than that of SBI (2QFY23: 42.9%). PNB's cost of funds has also benefited from its low-cost liability franchise. The agency believes that given the bank's market share in system advances is significantly higher than that of its current account deposit market, it would continue to benefit from its focus on improving the CASA ratio.

**Liquidity Indicator - Superior:** PNB's short-term (one year) asset-liability surplus stood at 7.5% at 4QFY22. The bank also maintained 24.4% of the total assets in balances with the Reserve Bank of India and in government securities in 4QFY22, which assures Ind-Ra that it is adequately placed to meet its short-term funding requirements. Moreover, PNB maintained a liquidity coverage ratio of 164.11% in 2QFY23 on a consolidated basis as against the regulatory requirement of 100%.

**Increasing Pre-Provisioning Operating Profit; Although Profitability Under Pressure:** Post-amalgamation, which was effective from 1QFY21, PNB has reported profit for the last 10 consecutive quarters and profit for FY22 grew significantly over FY21. However, the trend has been volatile, partially due to the pandemic. During 1HFY23, the profit after tax declined sharply to INR7.2 billion (1HFY22: INR21.3 billion) on account of higher provisioning requirements, despite a healthy growth in the pre-provisioning operating profit to INR109.5 billion (INR101.2 billion). The management has guided for a further decline in the the gross non-performing assets and gross non-performing assets ratios. The agency believes that the provisioning requirement in FY23 is likely to remain elevated on a yoy basis and it will still remain significant due to: i) ageing provisioning requirements; and ii) provisioning requirements for fresh slippages, including that from the emergency credit line guarantee scheme and COVID-19 restructuring pools.

**Asset Quality Challenges Continue:** PNB maintained a provision coverage ratio of 66.3% (excluding technical write-offs) in 2QFY23 (2QFY22: 63.2%), which has been increasing but is still at the lower end within the peer group. The bank also carried almost 100% provisions against its exposures to the National Company Law Tribunal (NCLT)-1 and -2 lists and 99.3% against the overall NCLT exposure in 2QFY23. In 2QFY23, its gross non-performing assets and net non-performing assets continued to decline but remained elevated at 10.48% and 3.80%, respectively, (2QFY22: 13.63% and 5.49%, respectively) compared to peers. Furthermore, the special mention accounts-2 pool with ticket size of above INR50 million accounted for INR20.7 billion (0.27% of the net advances) in 2QFY23, along with a COVID-19 restructuring pool of INR139.4 billion (1.80% of net advances) and emergency credit line guarantee scheme outstanding of INR128.7 billion (1.66% of net advances), together 3.7% of the net advances, which is the potential pool for slippages over the near-to-medium term.

## Rating Sensitivities

**Negative:** PNB's Basel III Tier 2 bond ratings have been equated to its Long-Term Issuer Rating, which could change if, in Ind-Ra's opinion, the Govt's support stance for PSBs changes or there is material drop in the banks' systemic importance which could, among other things, reflect in a material decline in PNB's market share or loss of deposit franchise.

The notching of the AT1 bonds could be widened from its anchor ratings if Ind-Ra believes that there is a dilution in

the government's support stance towards hybrid instruments of PSBs or any delay in the timeliness of extending this support. This could reflect among other things in capital buffers continuing to be close to the regulatory levels. Ind-Ra also expects that for banks with weaker unsupported profiles, the capital buffers would be higher; if not, it could reflect in wider notching from the Long-Term Issuer Rating. These capital buffers could be important as PNB's ability to service the instrument could be impaired in the event of the bank making losses and/or if the capital levels are below the regulatory minimum.

## ESG Issues

**ESG Factors Minimally Relevant to Rating:** Unless otherwise disclosed in this section, the ESG issues are credit neutral or have only a minimal credit impact on PNB, due to either their nature or the way in which they are being managed by the entity. For more information on Ind-Ra's ESG Relevance Disclosures, please click [here](#). For answers to frequently asked questions regarding ESG Relevance Disclosures and their impact on ratings, please click [here](#).

## Company Profile

PNB had a domestic branch network of 10,038 branches, two international branches and 12,966 automated teller machines as of September 2022. Of the existing branches, 38% are located in rural areas, 24% in semi-urban and the balance 38% in urban and metro regions.
